About MSP

We're the people whose software gets F1 teams to the front of the grid and fighter jets into the air – thanks to parts being manufactured perfectly, every time.

From our base in rural Alnwick, in partnership with our associate global company Renishaw PLC, we're creating the next generation of precision-measurement technology for some of the biggest, global names in manufacturing.

We're building a world-wide reputation for the quality of our metrology products, and have ambitious plans for growth. We're currently in expansion mode, and are looking for a number of highly-motivated and enthusiastic people to join our team.

About you

We're looking for natural born problem-solvers, people who relish the challenge of helping transform our customers' operations.

You have an aptitude for innovation, with a real enthusiasm for teaching and demonstrating. Skilled at time-management, you'll be able to work across many different projects at once.

You will also be happy to travel internationally, sometimes for extended periods of time. A driving licence is essential, and you'll need to be comfortable driving in foreign countries.

If this sounds like you, please read on.

Applications Engineer

Essential skills, qualifications and experience

You'll need a degree in an Engineering discipline – or an equivalent level of experience on a machine shop floor.

We are also looking for:

- Self-confidence, professionalism and self-motivation
- Good relationship-building skills
- An ability to set your own goals, and work on your own initiative
- Good written and spoken communication skills

Desirable skills and experience

We'd be interested if you also bring:

- A basic knowledge of machine programming languages
- Experience of manufacturing machine tools

Join us.
