## About the role

Based in Alnwick, Northumberland

Full time, permanent contract

We offer a salary to match your experience, with annual pay reviews.

## Benefits

Flexi-time

Annual discretionary bonus

Group life insurance

Free parking

## About MSP

We're the people whose software gets F1 teams to the front of the grid and fighter jets into the air – thanks to parts being manufactured perfectly, every time.

From our base in rural Alnwick, in partnership with our associate global company Renishaw PLC, we're creating the next generation of precision-measurement technology for some of the biggest, global names in manufacturing.

We're building a world-wide reputation for the quality of our metrology products, and have ambitious plans for growth. We're currently in expansion mode, and are looking for a number of highly-motivated and enthusiastic people to join our team.

## About you

Are you a natural-born problem solver? Would you relish the challenge of crafting code that literally transforms the shape of some of the most innovative machines in the world?

Do you enjoy investigating complex problems until they're completely resolved? Would you thrive on developing code that works seamlessly in our robust test environments and across multiple live products?

**If this sounds like you, please read on.**

# Software Engineer

---

## Essential skills, qualifications and experience

---

Ideally, you'll have spent at least three years in a software development role. You'll also need a degree (or higher) in an engineering, scientific or mathematical discipline.

### We're especially looking for:

- Sound working knowledge of C++ or C, Java and C#
- Thorough understanding of object-orientated design and programming
- Strong analytical and conceptual skills
- Experience of executing and documenting unit tests
- Ability to work well in a team and contribute ideas

## Desirable skills and experience

---

MSP's key strengths are in metrology, CNC and manufacturing. You don't need to have direct experience in any of these areas, but it's a bonus for us if you do.

### We'd also be interested to hear if you have any experience in:

- 3D geometry
- 3D graphics
- Matrix operations
- XML
- Open GL
